

MAG PEN 3

Rechargeable LED pencil worklight with 80 lumen

ORIGINAL
SCANGRIP

SINCE 1906

The new generation MAG PEN 3 is the enhanced version of our bestselling MAG PEN 2 (03.5108) pencil work light. A "must have" work light for every professional user – always at hand!

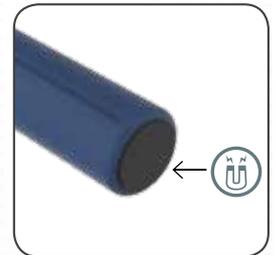

Priced as its predecessor, the MAG PEN 3 has been significantly improved in lumen output, design and functionality.

The MAG PEN 3 provides a powerful illumination, both from the lamp head and precision top light. A side switch ensures easy single-handed switch on/off operation.

Featuring a sturdy rubber surface and a durable construction with a comfortable grip, the design is compact allowing access in the most inaccessible places.

MAG PEN 3 comes with built-in magnets for suspension or storage - both in the clips (improved for MAG PEN 3) and at the bottom of the penlight. The turnable clips makes the built-in magnet more usable for difficult work areas and at different angles.

MAG PEN 3 is easily rechargeable with USB cable, which avoids time-consuming, annoying replacement of batteries.
